Profile

Web Development student at Utah Valley University with a strong interest in learning, growing, and improving as a developer. A fast learner who enjoys building and testing web applications using HTML, CSS, and JavaScript. Comfortable working with testing and QA tools, Git/GitHub, and team-based development workflows. Currently earning a bachelor's degree while paying my way through school and gaining real-world development experience.

Professional Experience

QA Software Tester, *Rocky Mountain ATV/MC*   07/2025 – Present
                                                                                          Spanish Fork, UT
- Tested web and internal software applications to identify bugs and usability issues
- Created clear, detailed bug reports with steps to reproduce, expected results, and supporting screenshots or screen recordings.
- Collaborated with developers, product managers, and other QA testers to verify fixes and support quality releases.
- Tested features across multiple browsers and devices to ensure consistent behavior and user experience.

Team Lead, *Rocky Mountain ATV/MC*   04/2021 – 2025
                                                                                          Payson, UT
- Oversaw daily operations for the Tires department, coordinating staffing, workflow, and order fulfillment.
- Determined staffing needs based on daily workload to ensure shipping goals were consistently met.
- Worked closely with team members to improve efficiency, communication, and overall teamwork.

Projects

Francis Davis Millet, *Web Project*   08/2025 – 12/2025
- Collaborated with stakeholders to redesign the official Francis Davis Millet website, a leading platform showcasing his art, life, and related research.
- Worked with a team to improve the site's visual design by creating updated hero images for a more modern and engaging look.
- Designed and implemented a new Featured Works page to highlight the latest research and content related to Francis Davis Millet.
- Contributed to improving overall site structure and user experience to better support content discovery and storytelling.
